COMPASS RESEARCHERS WEEK IN GENOA

Innovation, Research and Knowledge Transfer In Tourism, Arts and Heritage

This event offers an opportunity for the Ulysseus community' researchers to engage with peer experts and stakeholders in order to establish new collaborations and knowledge transfer opportunity, as well as to develop joint European projects, scientific workshops, seminars, courses and mobilities.

The **Researchers' Week** aims to connect **tourism, arts and heritage** with the main societal challenges as, for instance, ageing, mobility, and regional development, with a specific focus on how robotics and digitalisation can be used to increase the sustainable exploitation of related areas.

For **three days**, the participants will **meet in Genoa** with the goal to identify synergies and advance collaboration between Ulysseus partners in the subjects' field.
