Studying at BUCT

A wish and a dream that I have had since the day I arrived at the campus. I spent two weeks in Beijing and there I understood how fascinating that city is. Many traditions, history and art. Everywhere something to discover. Now that I'm attending BUCT's lessons I'm learning Chinese culture: architectures, monuments, festivals, wedding, the way to prepare tea and other lots of things...

However what I like most is learning the language.

At the beginning I was a bit scared and I thought it would have been a real challenge learning this language, but now I know that even if it's not simple, I can learn it with patience and determination. Also because when you realize that you can understand short dialogues or you learn how to write the first sentences, you can feel really happy and also a bit proud of the objectives you've reached.

Teachers are helpful and they know how to involve us.

Even if we are working from home, they do know how to motivate us.

I hope to meet them as soon as possible and to learn the language well so that I will be able to talk to them in Chinese.

Now I'm working hard, because what I have it's a unique opportunity.

Everything we study, the places we visit and the people we meet can help us grow and get a deeper and wider vision of life.

This experience is one of them.

(MUSIO)

I remember the first time I got into BUCT last summer during 2019 International Summer Camp for S & T Innovation - BUCT (Exchange & Collaboration Fusion & Development). I felt extremely anxious about discovering such a new big place and the fact that it was my very first time in Beijing made me feel even more electrified. Indeed when I got the opportunity to jump into the BUCT world one more time, I did not think about it twice! Although right now I'm experiencing something completely different from what I expected due to the situation of the pandemic, I can see the great effort that BUCT is showing to make us feel welcome and perfectly involved as we were right there, in Beijing, via online courses. The lectures we're taking are incredibly interesting and I am everyday more eager to know about Chinese language and country. I hope that there it could be the chance to come to China again and visit what I missed there, and this time with more knowledge thanks to what I achieved in this months of hard but satisfying work.

THANKS FOR ATTENTION
